

## **Practicum/Intern (Bachelor or Master level)**

Practicum/Intern Students serve an important role by providing quality, culturally responsive care through individual Wellness Coaching and student-facilitated Wellness Support groups under our internal Access Initiative (AI) Program. In addition, the Practicum/Intern Student supports the administrative, development, and marketing-related tasks of the practice. This position will encompass both direct client services and administrative tasks.

Goal Driven Counseling is one of the first Black-owned, 100% virtual, multi-state, private group counseling practices in the U.S. Our mission is to empower our clients in the pursuit of their mental health goals while reducing barriers to care in underrepresented communities through virtual care. We pride ourselves on our diverse, supportive, inclusive, and committed team who are representative of the clients we serve. Although our team is 100% virtual across states, our company culture is one that is inclusive, affirming, and empowering no matter the distance. This position is 100% virtual with the expectation of being solely remote.

We value collaboration, quality care through trauma-informed approaches, and the importance of wellness not only for our clients, but our team as well. Through a supportive team approach, we are committed to the development of clinical professionals through a modern and forward thinking approach.

### **Required Qualifications**

- Education: Currently enrolled in an accredited bachelors or masters degree program in one of the following fields: social work, counseling, human services, psychology, or a related field
- Students providing Wellness Coaching must be enrolled in their second year/ and concentration practicum at the Masters level
- Interest in private practice and/or entrepreneurship desired
- Experience: No previous experience required

### **Possible Learning Experiences (Tailored in Learning Agreement):**

Knowledge, skills, and abilities based on ASWB licensing examination content outlines including, but not limited to:

- Human growth and development
- Diversity, Discrimination, and Oppression
- Social/Economic Justice
- Biopsychosocial history taking
- Assessment Methods and Techniques
- Intervention Planning and Treatment Modalities
- Treatment Planning and Follow Up
